

LOWER IS BETTER

The lower the HERS score, the more you save!

ENERGY PERFORMANCE LEVEL DISPLAY CARD

HERS INDEX:

The Home Energy Rating System (HERS) is the industry standard scoring system that measures a home's energy efficiency on a scale from zero to 150.

*RESNET, or Residential Energy Services Network, has developed the HERS Index to indicate the comparative efficiencies of homes. It is not a guarantee of energy-efficiency or cost savings. Typical existing home is based on the U.S. Department of Energy definition with a HERS Index of 130. Typical new home is based on the RESNET Reference Home definition with a HERS Index of 100 (based on the 2006 International Energy Conservation Code). Mattamy Homes uses certified independent HERS energy raters to provide energy efficiency ratings for homes as designed pursuant to the applicable floor plan. Energy efficient features will vary depending upon the floor plans, elevations, design amenities/upgrades and the location of the home. Seller does not represent, warrant, or guarantee all homes sold by Seller have been individually rated. Further an energy rating score may or may not factor in all options and/or upgrades available to be installed in the home. Actual energy costs and/or energy usage are dependent on a number of factors, including utility rates, energy consumption, home maintenance, size of household, energy conservation practices, home orientation, and surrounding climate and weather conditions.
